#### **Report**

Physics Sullamussalam Science Department College of conducted a talk on X-ray Diffraction, a powerful tool in material characterization by Dr Sabeena. M, Assistant Professor Department of Physics.Cochin University of Science and Technology Kochi Around seventy students from both BSc and MSc Physics and the teachers participated in the programme. The National Seience Day is celebrated in India on 28th February every year to commemorate the famous discovery of Raman Effeet by Indian Physicist and Nobel prize winner Sir Chandrasheka Venkata Raman on 28 February 1928. The programme aim to celebrate the day with great enthusiasm and to impart the scientific temper in the mind of students especially girls as the focal theme of this year's science day is Women in Science. Dr Sabeena Shared with students not only the concept but also how to face the challenges in the path to research to girl students. Dr Sabeena during her class interacted with students and shared all the concepts about X-ray diffraction X-ray diffractometer and its parts How the XRD pattern gives us the details of the erystal planes and its orientation. She discussed various planes in the crystal and how it is related to the Bragg's law Also about the conceptual understanding of characterization and analysis of various amorphous and crystalline materials She ended the talk by advising the students to study the basic concepts of Physics then only science become interesting subject to all She motivated the students to move towards the area of research in Science. The session was inaugurated by Dr P.

Mohammed Ali Sir and CA Safeeque Head of the Department of Physics presided over the function Dr NAM Shanid speaks over the importance of celebrating National Science day and Afnan. M of MSc Physics given the vote of thanks. Mr Mohammed Shahamath TK of final year BSc Physics awarded prize for his excellent performance (18 rank) in the APT-TSE examination.
